INSTALLATION PROCEDURE

S@fe2Click Client

☐ 1. Download the S@fe2Click Client installation package.
   a. HMC7 will provide the download link to you.

☐ 2. Minimum S@fe2Click Client Requirements:
   a. Microsoft Outlook 2010 or newer

☐ 3. Install S@fe2Click Client on the computers that you want to run it on.
   a. If you want to run the app on just a few PC's, then just install S@fe2Click Client manually on each one, using the installation package
   b. If you want to run the app on many PC's, then give the installation package to your IT department

Your IT department can install the application using SCCM (System Center Configuration Manager). They can distribute the application to all your PC's or just a subset.

S@fe2Click Admin Console

The Admin Console is used to administer the vetted addresses for the S@fe2Click application. The application lets the user add email addresses and check to see if an email address has already been added.

☐ 1. Download the S@fe2Click Admin Console installation package.
   a. HMC7 will proved the download link to you.

☐ 2. Minimum S@fe2Click Admin Console Requirements
   a. Windows 8 or newer
   b. Or, Windows Server 2012 or newer

☐ 3. Install S@fe2Click Admin Console on just a couple of PC's that you need to administer the vetted emails from.
   a. Install the Admin Console application manually on each PC or server you would like to run it on using the S@fe2Click Admin Console installation package.
   b. Enter in the email address that you would like to use with S@fe2Click
   c. Start using the S@fe2Click Client.

HMC7 will walk you through each step of the phase as well as train you and your staff on how to use S@fe2Click.
